

Internship in the Department of Developmental Psychology!

THE RESEARCH PROJECT IN SUMMARY

- ◆ We - the team of developmental psychology of the University of Osnabrück - implement an intervention at schools. The intervention pursues the goal of sustainable promotion of a positive school climate through tolerant coexistence & strengthening of cooperation between students of different cultural groups and backgrounds. In the course of this, we collect longitudinal data as well as data on the school's social network.

WORKING IN AN INTERNATIONAL RESEARCH PROJECT

- ◆ In cooperation with our project partners in Utrecht, Barcelona, Hagen and Krakow, we are specifically investigating the extent to which our perception of certain social norms promotes our tolerance towards other groups and counteracts tendencies towards polarization.

More information about this and other projects: https://www.psychologie.uni-osnabrueck.de/subfields/developmental_psychology/current_studies/together_for_tolerance.html

BE THERE AND EXPERIENCE HOW THE PROJECT IS CONDUCTED!

- ◆ We are looking for motivated students who want to help us implement the project. The tasks are varied and depend on the desired internship period. Contact us so that we can find out together how you can best apply your knowledge and strengths to the project.
- ◆ Possible tasks include: Helping to build the project website, translation tasks, and implementing an Educast to visually represent our materials.

Starting IMMEDIATELY or at any time with flexible hours:

GO TO SCHOOLS WITH US AND HELP WITH DATA COLLECTION!

You can send your application (in a pdf document) to Wilma Middendorf (wilma.middendorf@uos.de) with the subject *ResearchInternship_YourName*.

BACK TO SCHOOL - are you ready?
